***Response to Arguments***

1. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Therkorn in view of Webber. The rejection to Therkorn from the previous office action is incorporated herein. Additionally, Therkorn does not show the carriage having two sections. Thus, Webber shows a support for a users body having pivotally connected sections. It would have been obvious to one having ordinary skill in the art at the time the invention was made to separate a body support into multiple sections from one integral section in order to accommodate a variety of different sized users.
4. Claims 2-3 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claims 10-20 are allowed.
